There was another measure too which Samuel Fequibel faired better in the open air of common | Lee Hart sense than in the mystifying atmos. Jesus M. Valerto phere of debats. It related to the payment of railroads for hanling the mails. Heretofore mail has been paid for by its average weight and the average has been found by taking the weight of the mail for the seven days of the week and dividing that amount by six which represents the working week. The advant | St. Louis, - Lend S6.10 age to the railroads and the less to the government are obvious. The Murdock amendment which was designed to Silver, 69 4c, remedy this condition was defeated in both Houses by the railrand loby here but about the last act of Mr. Cortelyon before leaving the Post Office Depart ment was to issue and order -providing for the referm-referred to in this bill. The railroads will lose several millions of dollars a year by the rule and to say that they are denouncing "Executive ness before the Commerce Com. interference" is to put it mildly, but mission. that does not keep either Mr. Roosevelt sor Mr. Cortelyou awake nights.
